EXPERIENCE

Ai-UP (Startup)

Founding Software Engineer

Moscow, Remote

Oct 2024 – current

Working as part of a team of 3 founding engineers to create and scale a **B2B, lead-generation SaaS** product.

- Took a leading role for the front-end development of the web app with **NextJs** using **TypeScript**.
- Built a coherent design system with **shadcn** and **TailwindCss**.
- Optimized performance by managing server state with **react-query** and client state with **zustand**.
- Helped scale to over **10000 users**, with **44% conversion rate** to paid users in a year.
- Delivered an **MVP** within **1 month**, allowing us to become **profitable** by the 2nd month.

Capgemini Invent

Frontend Software Engineer

London, Remote

Oct 2022 – Oct 2024

Helped build a greenfield solution that automates SR1 form submission, saving healthcare professionals up to 5 days as compared to mailing paper-based forms.

- Took on a leading role for the front-end development of a server-side rendered app in **Node** with **Typescript**.
- Integrated **Redis** database as a session store and **GraphQL API** for address lookup.
- Ensured over 99% test coverage with **Mocha** test framework.
- Collaborated with User Research and Design to optimize user journey and ensure prototype completion.
- Empowered more junior colleagues to continuously improve with pair programming sessions.

ISpatial

Junior full-stack developer

Cambridge

Sep 2021 – Oct 2022

Helped develop 1StreetWorks - a web app for planning roadworks, cutting down planning time from months to minutes.

- Built secure RESTful API endpoints using **Spring** (Java) with authentication using **SAML** and **OAuth2**.
- Developed UI in **React (TypeScript)** for a web SaaS with users in 6 industries spanning 4 countries.
- Asserted over 80% test coverage using **JUnit** and **Selenium**
- Maintained a **PostgreSQL** database.

PERSONAL PROJECTS

Mercante (NextJs, TypeScript, Tailwind CSS)

Aug 2023 – Jan 2024

- Worked in a team of 5 to build a **RAG** tool to help businesses cut costs with our sales bot.
- Helped implement the frontend in **NextJs** with **TypeScript** and **Tailwind CSS** following designs.
- Integrated automatic responses to customer emails with **GMail**

Sponsor Spotter (ReactJs, Pub/Sub, Firebase, YouTube API, Algolia)

Aug 2025 – Sep 2025

- Built a web app that automates competitor analysis by getting sponsor links from YouTube videos.
- Used **cloud functions** and firestore **NoSQL database**, connected to **Pub/Sub** to automatically fetch data.
- Used **Algolia** to allow the users to search videos by sponsor and export data as a CSV file in under 1 minute.

SKILLS

JavaScript, TypeScript, React, NextJs, TailwindCss, jest, NodeJs, Express, Docker, Git

EDUCATION

University of Southampton

MEng Computer Science 2:1

Southampton, Hampshire

Sep 2017 – Jul 2021
